

RigNet Comm Link

RIGNET WIRELESS SOLUTIONS

Access your network files, send daily reports, make phone calls, and research using the internet. RigNet Comm Link paired with RigNet Wireless.

RigNet's Comm Link was designed to provide Internet and or phone service to a customer/contractor using RigNet's Wireless Broadband. Our customers can now add the Comm Link box into their communications package. Comm Link works with our RigNet's Wireless Broadband from the company trailer, pole on location or drilling rig on location. The RigNet Comm Link can work on any trailer on site including company reps, mud loggers, directional drillers, and mud engineers.

Easy Installation

- Place the Wireless Radio on the outside of the building, with easy mount.
- A single cable is ran from the Wireless Radio into the office building and plugged into Comm Link.
- Plug PC and Desk IP Phone and Ethernet into the appropriate ports on the Comm Link.
- Enjoy Wireless Internet
- Content Filtering Included
- Secure Corporate Network
- End to End VLAN Connectivity
