

# RigNet CrewConnect™ Hotspot

**RigNet**  
CrewConnect™

## HIGH-PERFORMANCE CREW WELFARE PORTFOLIO, FOR HIGH-PERFORMANCE CREWS

RigNet's CrewConnect is a portfolio of crew welfare services grounded in reliable, secure, controlled connectivity. The CrewConnect portfolio is designed to improve crew morale in remote locations, enhancing operational efficiency through reduced employee turnover and increased productivity.

### CONNECT WITH **FLEXIBILITY**

CrewConnect Hotspot is a self-service, easy-access network connection dedicated to contractors and crew. Competitive payment options are offered through a number of channels from PayPal, to credit cards, to vouchers. The Hotspot is a reliable, on-demand internet connection, allowing your crew to connect to the world when and where they want, improving morale and productivity, creating a better workplace.

### CONNECT WITH **INDEPENDENCE**

The Hotspot network is completely separate from your corporate network, providing crew with a private and secure connection off-shift with zero interference in the corporate network. Network separation enables greater control, stronger security and reduced risk to corporate data.

### CONNECT WITH **EFFICIENCY**

CrewConnect Hotspot is a fully-managed service provided directly to your crew by RigNet. The Hotspot is pay-per-use, enabling you to share the cost of providing bandwidth with your crew. Fully supported by RigNet, the Hotspot is your risk-free option for a personal crew data network.

## FLEXIBLE, PRIVATE, SECURE CONNECTIVITY

### Improved User Experience

- **Intuitive interface**
- **Private, secure connectivity**

### Network Separation

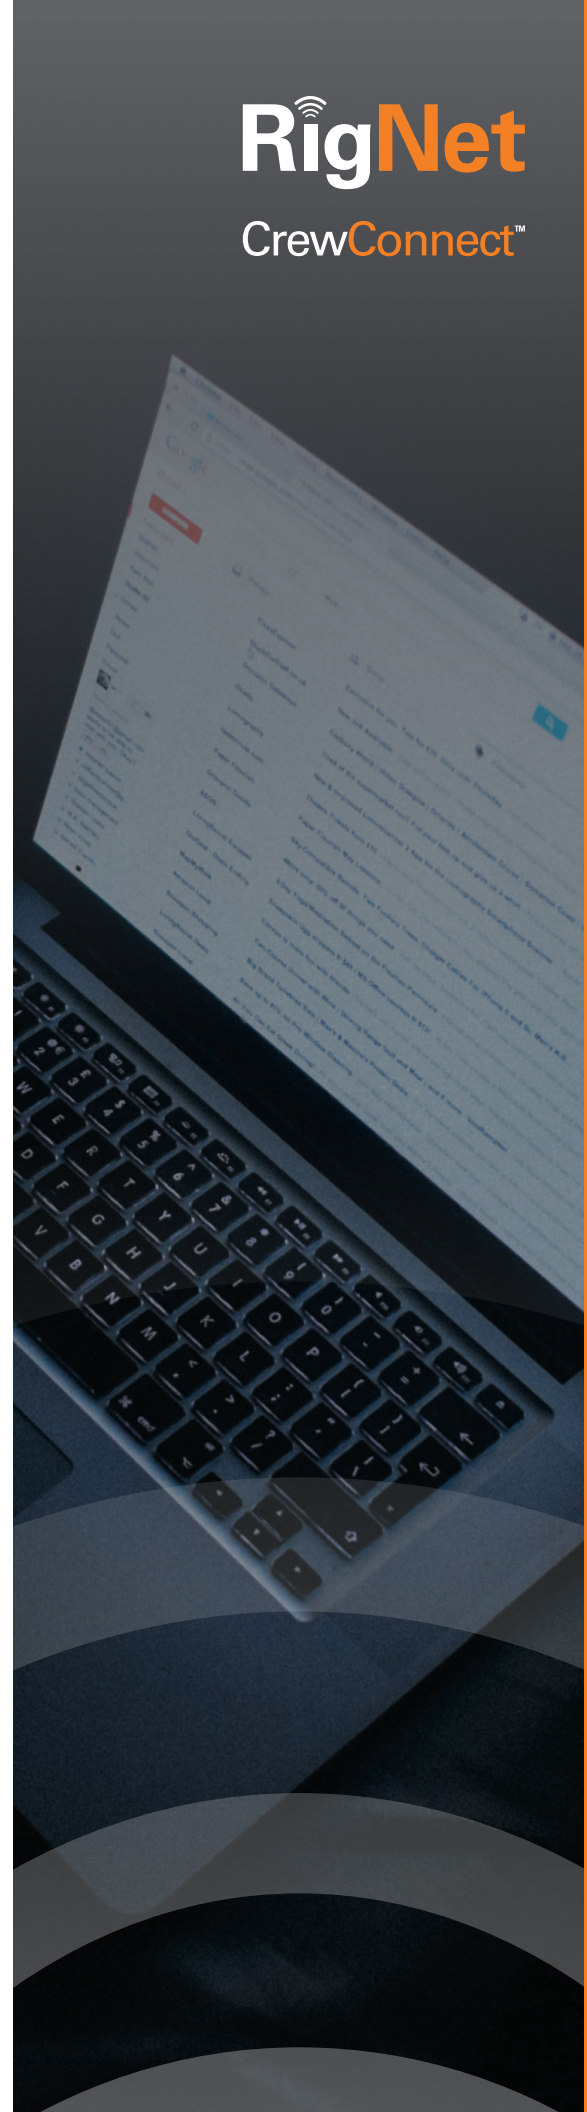

- **Personal and corporate data usage separated**
- **Distinct, fully-managed network**

### User Management

- **Pay-per-use and fair usage policy**
- **Simplified connectivity**

### Content Filtering and Security

- **Application filtering**
- **High-security performance**

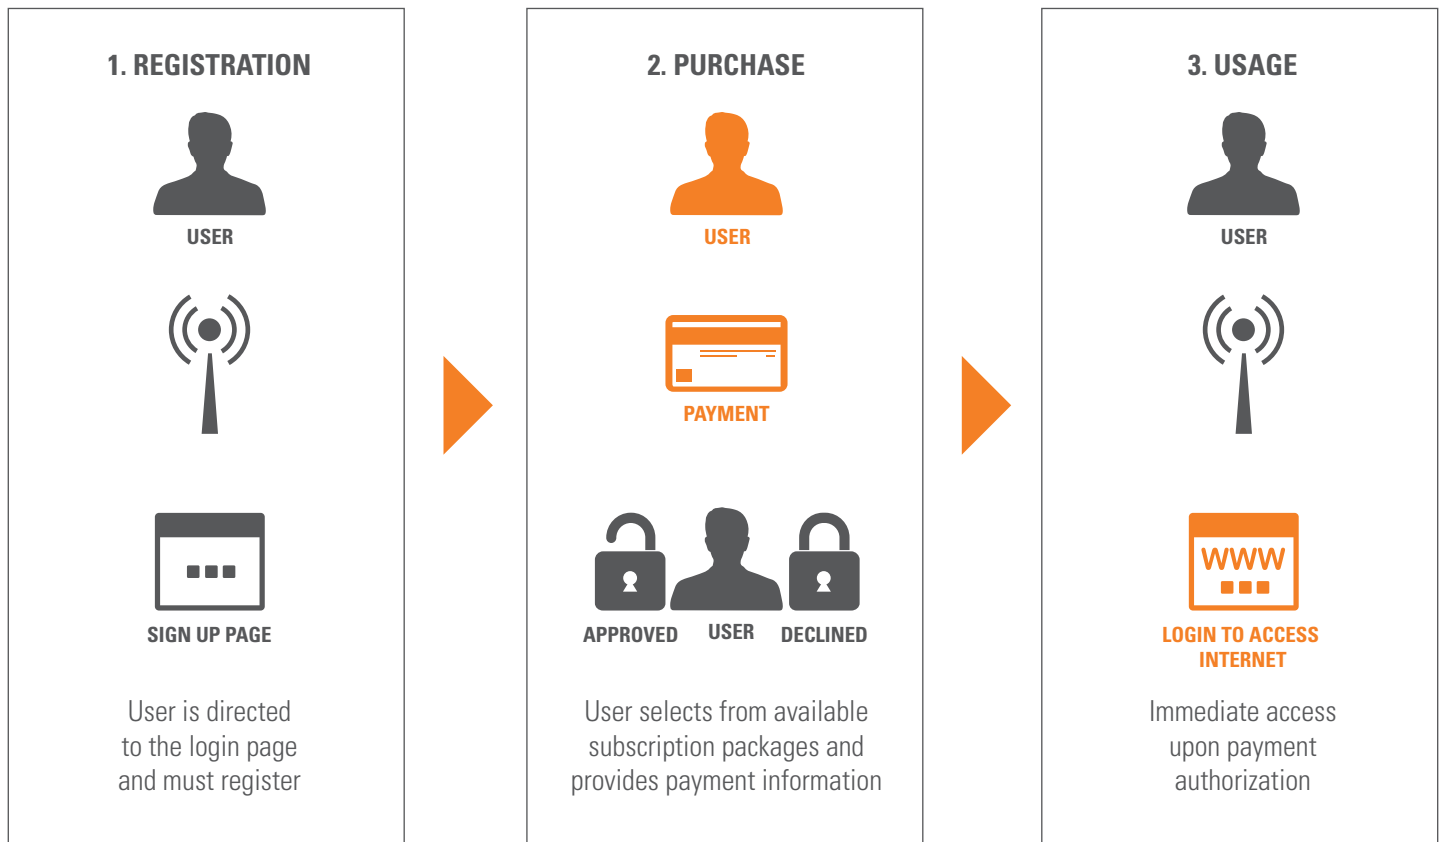

**CREWCONNECT HOTSPOT** – PRIVATE, SECURE, FULLY-MANAGED CONNECTIVITY FOR ALL

Solution	Benefit
Crew and corporate networks separation	Two dedicated systems remove the potential security risks to corporate data.
Guest access management	Private and secure internet access for visitors, contractors and crew enables the operator to manage access levels.
Fair usage	Control features in the service enable management of a fair usage policy for users on the remote site
Content filtering and security	Application (Layer 7) filtering is enabled to limit virus spread and security risk.
Improved user experience	Robust security, privacy assurance, a user-friendly interface and fair usage policies ensure a better performing network.
Cost neutral network	RigNet assumes the cost of provisioning a standard Hotspot service to crew. Higher standards of connectivity can be purchased by crew or operators on a pay-per-use basis.
Peace of mind	RigNet's 24/7 technical support engineers ensure end-to-end project execution and always-on support.

**CONNECTIVITY FLOW** – CLEAN, CONTROLLED ACCESS TO A HIGH-PERFORMANCE NETWORK

**USER ACCESS PROCESS** – SECURE, PAID-FOR ACCESS WITHIN YOUR CONTROL
