

Remote Communications Utility Trailer (RCUT)

RIGNET MOBILE SOLUTIONS

Integrated push button technology allows your company to have internet and phone lines within minutes of arriving on location.

The self-contained Remote Communications Utility Trailer (RCUT) offers reliable communications in a portable package. The utility trailer offers a solution for job site location changes. You no longer have to wait for a technician to relocate your communications. The trailer can be pulled by any class -2 hitch vehicle. Using integrated push-button technology, you could be working with phones and internet within minutes of arriving on-site.
