## SASB (Self Acquiring Satellite Box)

### RIGNET MOBILE SOLUTIONS

Phone and Internet connectivity at remote locations with integrated push button technology. **No technician installation needed.**

Meet the next generation in VSAT Communications, the RigNet SAS Box. Thanks to our exclusive in house design, RigNet can offer your company the same high communication standards you experience in your office in remote field locations. The SAS Box allows our customers to have immediate phone and internet connectivity at remote locations without the need for technician installation.

#### Benefits of the SAS Box

#### Location Changes Made Easy

The SatCom Box can be transported in a standard pickup truck and can be lifted by a crane or a forklift. The dish stows inside of the box for easy transportation. The SatCom Box makes job site location changes easier than ever before. You no longer have to wait for a technician to relocate your communications hub.
